**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/JP99/00875

I. Basis of the report

1. This report has been drawn on the basis of *(substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.)*:

Description, pages:

1-59 as originally filed

Claims, No.:

1-6 as originally filed

Drawings, sheets:

1/7-7/7 as originally filed

2. The amendments have resulted in the cancellation of:

- ☐ the description, pages:
☐ the claims, Nos.:
☐ the drawings, sheets:

3. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

see separate sheet

II. Priority

1. ☐ This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:

☐ copy of the earlier application whose priority has been claimed.

☐ translation of the earlier application whose priority has been claimed.

2. ☐ This report has been established as if no priority had been claimed due to the fact that the priority claim has

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT**

International application No. PCT/JP99/00875

been found invalid.

Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.

3. Additional observations, if necessary:

see separate sheet

III. Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

The questions whether the claimed invention appears to be novel, to involve an inventive step (to be non-obvious), or to be industrially applicable have not been examined in respect of:

☐ the entire international application.

☒ claims Nos. 1-6 all partially.

because:

☐ the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (*specify*):

☐ the description, claims or drawings (*indicate particular elements below*) or said claims Nos. are so unclear that no meaningful opinion could be formed (*specify*):

☐ the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed.

☒ no international search report has been established for the said claims Nos. 1-6 all partially.

**INTERNATIONAL PRELIMINARY
EXAMINATION REPORT - SEPARATE SHEET**

International application No. PCT/JP99/00875

Re Item I

Basis of the report

1. This report was established based on the application documents and the written sequence listing pages 1/27-27/27.

Re Item II

Priority

1. The present application appears to validly claim priority from 27.02.1998. Any documents cited in the International Search Report as P documents have therefore not been considered as comprised in the prior art relevant for the present application.

Re Item III

Non-establishment of opinion with regard to novelty, inventive step and industrial applicability

1. An International Search has only been carried out on the protein and cDNA sequences of clone HP01434 (SEQ ID NOs:1, 8, 15), (see Form PCT/ISA/210). Accordingly, all other clones and sequences need not be the subject of International Preliminary Examination (Rule 66 1(e) PCT). Hence claims 1-6 will be examined partially.

Re Item V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Novelty (Article 33(2) PCT)

The present application discloses human transmembrane proteins, cloned from a cDNA library.

The subject matter of claims 1-6 appears novel since the complete SEQ ID NOs: 1, 8 and 15 have not been disclosed in the available prior art.

2. Inventive step (Article 33(3) PCT)

Due to the fact that no function has been established for the protein encoded by clone HP01434, the claimed sequences are not associated with any known technical effect. Accordingly, the only underlying technical problem that can be recognised is the provision of further transmembrane proteins and the cDNAs encoding such. To establish inventive activity, the provision of a sequence must be justified by the technical purpose, i.e. by a hitherto unknown or unexpected technical effect, caused by those technical features which distinguish the claimed molecules from numerous other ones. Due to the absence of any disclosed function or technical effect, the provision of the present sequences amounts to nothing more than an arbitrary selection. Consequently, the claimed proteins and nucleic acids as well as vectors and host cells relating to them (claims 1-6) are considered to lack an inventive step, pursuant to Article 33(3) PCT.

3. Industrial applicability (Article 33(4) PCT)

In so far as the present specification is completely silent with regard to the function of the protein encoded by clone HP01434, the possible fields of application for the claimed protein and polynucleotides suggested in the specification are merely speculative. Thus it is questionable whether the claimed subject-matter actually meets the requirements set forth in Article 33(4) PCT.

2. WO 98 54963 has been published after the priority date of the present application and does therefore not constitute prior art in the meaning of Rule 64(1)(b) PCT. Said document will, however become of relevance for novelty assessment should the application enter the European phase.

Box I Observations where certain claims were found unsearchable (Continuation of item 1 of first sheet)

This International Search Report has not been established in respect of certain claims under Article 17(2)(a) for the following reasons:

1. ☐ Claims Nos.:
because they relate to subject matter not required to be searched by this Authority, namely:
2. ☐ Claims Nos.:
because they relate to parts of the International Application that do not comply with the prescribed requirements to such an extent that no meaningful International Search can be carried out, specifically:
3. ☐ Claims Nos.:
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

Box II Observations where unity of invention is lacking (Continuation of item 2 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

see additional sheet

1. ☐ As all required additional search fees were timely paid by the applicant, this International Search Report covers all searchable claims.
2. ☐ As all searchable claims could be searched without effort justifying an additional fee, this Authority did not invite payment of any additional fee.
3. ☐ As only some of the required additional search fees were timely paid by the applicant, this International Search Report covers only those claims for which fees were paid, specifically claims Nos.:
4. ☒ No required additional search fees were timely paid by the applicant. Consequently, this International Search Report is restricted to the invention first mentioned in the claims; it is covered by claims Nos.:

see FURTHER INFORMATION sheet, subject 1.

Remark on Protest

- ☐ The additional search fees were accompanied by the applicant's protest.
- ☐ No protest accompanied the payment of additional search fees.
